

LOUIE'S ANIMAL Fun Facts

BEEES

- Bumblebees harvest nectar and pollen from flowering plants. They are good for your garden!
- They live in smaller groups than honeybees.
- Bumblebees hibernate underground.
- They will mark a flower they have visited with their own scent so they know they were already there. The scent also tells fellow bumblebees that they have been there.

LOUIE'S ANIMAL Fun Facts

GRASSHOPPERS

- A grasshopper's ears are located on their abdomen, or stomach area!
- On each side of their first abdominal segment, tucked under their wings, they have a simple eardrum that allows them to hear the songs of fellow grasshoppers.
